

## The White Horse Scatter, 2025

### June update

---

Hi, Richard Sansom here from West Wilts VMCC, just an update on how this year's "Scatter" is progressing.

With the event date of Sunday July 13<sup>th</sup> fast approaching, entries are developing well.

In fact, the level of interest has enabled us to commit to placing an order for a "finishers award", namely a butterfly clutch pin, of the following design:

Although we aim to include all entrants on the day with an award, if numbers surpass plans, we may be required to issue on an application dated, first come, first served, basis.

In terms of folk that have signed up thus far, it's certainly evolving into quite a wide-ranging event.....

- Naked, sports, cruiser, touring, adventure and enduro style motorcycles
- Solo, sidecar & three-wheeler representation
- Machines from 1910 through the present day
- Twenty-five different manufactures
- "Journey in" distances of up to two hundred miles
- 30% new to attending a VMCC associated event
- 50% first time entrants

As for the event terrain, all forty locations have now been double checked in terms of their appropriateness and the validity of their associated “question”.

I can certainly vouch that having checked several, it's an amazing way to discover parts of the area that in a word, are stunning.

In terms of The Three Magpies venue, several entrants have expressed an interest in staying over at the pub's camp site.

So, if it's something you've been considering, you would not be alone.

Probably an appropriate time to mention that our friends over at the Dorset Section have intentionally scheduled their “Dakar” event the preceding day.

It's a gentle Green Lane run with plenty of opportunity to indulge in tea, coffee and cake, all surrounded by spectacular views.

Almost any light, VMCC eligible motorcycle can manage the lanes.

Take a look at the [Dorset Section](#) website if tempted to make a full weekend of it.

Finally, on the Beeline sponsorship front, our treasurer, Martin Hirst, has kindly donated a suitable case to accompany the “Moto II” GPS event prize.

Please share with those that may have an interest.

Best regards, Richard.

# THE WHITE HORSE SCATTER
